- [1] D. Grier and E. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” U. S. Patent 8,128,242, The University of Chicago (2012).
- [2] Y. Roichman, B. Sun, Y. Roichman, J. Amato-Grill and D. G. Grier. “System for applying optical forces from phase gradients.” U. S. Patent 8,174,742, New York University (2012).
- [3] Y. Roichman and D. G. Grier. “Three-dimensional holographic ring traps.” U. S. Patent 8,179,577, New York University (2012).
- [4] D. G. Grier, M. Polin, S.-H. Lee, Y. Roichman and K. Ladavac. “Manipulation of objects in potential energy landscapes.” U. S. Patent 7,973,275, New York University (2011).
- [5] D. G. Grier. “Topologically multiplexed optical data communication.” U. S. Patent 7,978,978, New York University (2011).
- [6] D. G. Grier, Y. Roichman, W. Man, P. M. Chaikin and P. J. Steinhardt. “Assembly of quasicrystalline photonic heterostructures.” U. S. Patent 7,981,774, New York University (2011).
- [7] Y. Roichman, D. G. Grier and I. Cholis. “System for characterizing a light field.” U. S. Patent 7,897,910, New York University (2011).
- [8] Y. Roichman, I. Cholis and D. G. Grier. “Volumetric imaging of holographic optical traps.” U. S. Patent 8,059,321, New York University (2011).
- [9] D. G. Grier, K. Ladavac and J. M. Barker. “System and method for holographic optic trap bonding.” U. S. Patent 7,678,222, New York University (2010).
- [10] D. G. Grier. “Topologically multiplexed optical data communication.” U. S. Patent 7,742,700, New York University (2010).
- [11] D. G. Grier and S.-H. Lee. “Multi-color holographic optical traps.” U. S. Patent 7,759,020, New York University (2010).
- [12] D. G. Grier, R. Agarwal, G. Yu, C. M. Lieber, K. Ladavac and Y. Roichman. “System and method for processing nanowires with holographic optical tweezers.” U. S. Patent 7,772,543, New York University (2010).
- [13] D. G. Grier. “Holographic microfabrication and characterization system for soft matter and biological systems.” U. S. Patent 7,847,238, New York University (2010).
- [14] S.-H. Lee and D. G. Grier. “Holographic microscopy of holographically trapped three-dimensional structures.” U. S. Patent 7,839,551, New York University (2010).

- [15] Y. Roichman, I. Cholis and D. G. Grier. “Volumetric imaging of holographic optical traps.” U. S. Patent 7,835,051, New York University (2010).
- [16] D. G. Grier, M. Polin, S.-H. Lee, Y. Roichman and K. Ladavac. “Manipulation of objects in potential energy landscapes.” U. S. Patent 7,473,890, New York University (2009).
- [17] D. G. Grier. “Topologically multiplexed optical data communication.” U. S. Patent 7,546,037, New York University (2009).
- [18] D. G. Grier. “Solute characterization by optoelectrokinetic potentiometry in an inclined array of optical traps.” U. S. Patent 7,586,684, New York University (2009).
- [19] D. G. Grier and E. R. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” U. S. Patent 7,588,940, University of Chicago (2009).
- [20] L. Gruber, K. Bradley, W. Lopes, R. Lancelot, J. Plewa and D. Grier. “System and method of sorting materials using holographic laser steering.” U. S. Patent 7,482,577, Arryx, Inc. (2009).
- [21] Y. Roichman, D. G. Grier and I. Cholis. “Extended optical traps by shape-phase holography.” U. S. Patent 7,491,928, New York University (2009).
- [22] D. Grier, W. Lopes and E. Dufresne. “Apparatus, system and method for applying optical gradient forces.” U. S. Patent 7,324,282, Arryx, Inc. (2008).
- [23] D. Grier and W. Lopes. “Apparatus and method to generate and control optical traps to manipulate small particles.” U. S. Patent 7,351,953, Arryx, Inc. (2008).
- [24] D. G. Grier and L. Gruber. “Broad spectrum optically addressed sensor.” U. S. Patent 7,390,461, Arryx, Inc. (2008).
- [25] J. E. Curtis, B. A. Koss and D. G. Grier. “Use of multiple optical tweezers for pumping, mixing and sorting.” U. S. Patent 7,176,445, The University of Chicago (2007).
- [26] D. Grier and W. Lopes. “Apparatus and method to generate and control optical traps to manipulate small particles.” U. S. Patent 7,161,140, Arryx, Inc. (2007).
- [27] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” U. S. Patent 7,227,688, New York University (2007).
- [28] D. G. Grier and J. E. Curtis. “Transverse optical accelerator and generalized optical vortices.” U. S. Patent 7,232,989, The University of Chicago (2007).
- [29] D. G. Grier. “Optical fractionation methods and apparatus.” U. S. Patent 7,233,423, The University of Chicago (2007).
- [30] L. Gruber, K. Bradley, W. Lopes, R. W. Lancelot, J. S. Plewa and D. G. Grier. “System and method of sorting materials using holographic laser steering.” U. S. Patent 7,241,988, Arryx, Inc. (2007).
- [31] J. E. Curtis, B. A. Koss and D. G. Grier. “Multiple optical vortices for manipulating particles.” U. S. Patent 6,995,351, The University of Chicago (2006).

- [32] D. G. Grier and E. R. Dufresne. “Apparatus for using optical tweezers to manipulate materials.” Singapore Patent 99739, University of Chicago (2006).
- [33] D. G. Grier, S. H. Behrens and B. A. Koss. “Optical peristaltic pumping with optical traps.” U. S. Patent 7,075,060, University of Chicago (2006).
- [34] D. G. Grier, E. R. Dufresne, J. E. Curtis and B. A. Koss. “Apparatus for using optical tweezers to manipulate materials.” U. S. Patent 7,104,659, The University of Chicago (2006).
- [35] D. G. Grier and J. E. Curtis. “Transverse optical accelerator and generalized optical vortices.” U. S. Patent 7,109,473, The University of Chicago (2006).
- [36] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” U. S. Patent 7,133,203, The University of Chicago (2006).
- [37] D. G. Grier and P. T. Korda. “Apparatus and process for the lateral deflection and separation of flowing particles by a static array of optical tweezers.” U. S. Patent 7,137,574, The University of Chicago (2006).
- [38] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” Japanese Patent 3895545, University of Chicago (2006).
- [39] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” Korean Patent 10-0641722, University of Chicago (2006).
- [40] J. E. Curtis, B. A. Koss and D. G. Grier. “Use of multiple optical vortices for pumping mixing and sorting.” U. S. Patent 6,858,833, The University of Chicago (2005).
- [41] D. G. Grier and S. H. Behrens. “Optical peristaltic pumping with optical traps.” U. S. Patent 6,847,032, The University of Chicago (2005).
- [42] D. G. Grier, E. R. Dufresne, J. E. Curtis and B. A. Koss. “Apparatus for using optical tweezers to manipulate materials.” U. S. Patent 6,846,084, The University of Chicago (2005).
- [43] D. G. Grier and E. R. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” U. S. Patent 6,863,406, The University of Chicago (2005).
- [44] J. E. Curtis, B. A. Koss and D. G. Grier. “Use of multiple optical vortices for pumping, mixing and sorting.” U. S. Patent 6,737,634, The University of Chicago (2004).
- [45] D. G. Grier and P. T. Korda. “Apparatus and process for the lateral deflection and separation of flowing particles by a static array of optical tweezers.” U. S. Patent 6,797,942, The University of Chicago (2004).
- [46] D. G. Grier and E. R. Dufresne. “Method for applying optical gradient forces and moving material.” U. S. Patent 6,624,940, The University of Chicago (2003).
- [47] D. G. Grier, E. R. Dufresne, J. E. Curtis and B. A. Koss. “Apparatus for using optical tweezers to manipulate materials.” U. S. Patent 6,626,546, The University of Chicago (2003).
- [48] D. G. Grier and S. H. Behrens. “Optical peristaltic pumping with optical traps.” U. S. Patent 6,639,208, The University of Chicago (2003).

- [49] D. G. Grier and E. R. Dufresne. “Apparatus for using optical tweezers to manipulate materials.” U. S. Patent 6,416,190, The University of Chicago (2002).
- [50] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” U. S. Patent 6,055,106, The University of Chicago (2000).

Patent Applications

- [1] D. G. Grier, S.-H. Lee and F. C. Cheong. “Tracking and characterizing particles with holographic video microscopy.” U. S. Patent Application 20110043607, New York University (2011).
- [2] P. M. Chaikin, D. Pine, N. C. Seeman and D. G. Grier. “Self-replicating materials.” U. S. Patent Application 20100090180, New York University (2010).
- [3] F. C. Cheong, D. G. Grier and S.-H. Lee. “Holographic microscopy of holographically trapped three-dimensional structures.” U. S. Patent Application 20100253762, New York University (2010).
- [4] D. G. Grier. “Topologically multiplexed optical data communication.” U. S. Patent Application 20100196004, New York University (2010).
- [5] D. G. Grier, K. Ladavac and J. M. Barker. “System and method for holographic optical trap bonding.” U. S. Patent Application 20100147456, New York University (2010).
- [6] D. G. Grier. “Solute characterization by optoelectrokinetic potentiometry in an inclined array of optical traps.” U. S. Patent Application 20100032556, New York University (2010).
- [7] Y. Roichman, I. Cholis and D. G. Grier. “Volumetric imaging of holographic optical traps.” U. S. Patent Application 20100288914, New York University (2010).
- [8] J. E. Curtis, B. A. Koss, D. G. Grier, K. Ladavac and K. Kasza. “Aberration correction of optical traps.” U. S. Patent Application 20080316575, The University of Chicago (2009).
- [9] D. G. Grier and E. R. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” U. S. Patent Application 20090250601, University of Chicago (2009).
- [10] D. G. Grier and E. R. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” U. S. Patent Application 20090250601, The University of Chicago (2009).
- [11] S.-H. Lee and D. G. Grier. “Holographic microscopy of holographically trapped three-dimensional structures.” U. S. Patent Application 20090027747, New York University (2009).
- [12] Y. Roichman, B. Sun, Y. Roichman, J. Amato-Grill and D. G. Grier. “System for applying optical forces from phase gradients.” U. S. Patent Application 20090231651, New York University (2009).
- [13] D. G. Grier. “Holographic microfabrication and characterization system for soft matter and biological system.” U. S. Patent Application 20080121790, New York University (2008).
- [14] Y. Roichman and D. G. Grier. “Three-dimensional holographic ring traps.” U. S. Patent Application 2008137161, New York University (2008).

- [15] Y. Roichman, I. Cholis and D. G. Grier. “Volumetric imaging of holographic optical traps.” U. S. Patent Application 20080094675, New York University (2008).
- [16] D. Grier and W. Lopes. “Apparatus and method to generate and control optical traps to manipulate small particles.” U. S. Patent Application 20070023622, Arryx, Inc. (2007).
- [17] D. G. Grier, Y. Roichman, W. Man, P. M. Chaikin and P. J. Steinhardt. “Assembly of quasicrystalline photonic heterostructures.” U. S. Patent Application 20070119522, New York University (2007).
- [18] D. G. Grier and J. E. Curtis. “Transverse optical accelerator and generalized optical vortices.” U. S. Patent Application 20070084993, The University of Chicago (2007).
- [19] L. Gruber, K. Bradley, W. Lopes, W. Lancelot, Robert, J. S. Plewa and D. G. Grier. “Systems and method of sorting materials using holographic laser steering.” U. S. Patent Application 20070235640, Arryx, Inc. (2007).
- [20] Y. Roichman, D. G. Grier and I. Cholis. “Extended optical traps by shape-phase holography.” U. S. Patent Application 20070139784, New York University (2007).
- [21] J. E. Curtis, B. A. Koss and D. G. Grier. “Use of multiple optical vortices for pumping, mixing and sorting.” U. S. Patent Application 20060054793, The University of Chicago (2006).
- [22] D. G. Grier. “Topologically multiplexed optical data communication.” U. S. Patent Application 20060056807, New York University (2006).
- [23] D. G. Grier. “Modulated optical tweezers.” U. S. Patent Application 20060163463, New York University (2006).
- [24] D. G. Grier, M. Polin, S.-H. Lee, Y. Roichman and K. Ladavac. “Manipulation of objects in potential energy landscapes.” U. S. Patent Application 20060131494, New York University (2006).
- [25] D. G. Grier, R. Agarwal, G. Yu, C. M. Lieber, K. Ladavac and Y. Roichman. “System and method for processing nanowires with holographic optical tweezers.” U. S. Patent Application 20060240591, New York University (2006).
- [26] D. G. Grier, K. Ladavac and J. M. Barker. “System and method for holographic optic trap bonding.” U. S. Patent Application 20060291019, New York University (2006).
- [27] J. E. Curtis, B. A. Koss and D. G. Grier. “Multiple optical vortices for manipulating particles.” U. S. Patent Application 20050173622, The University of Chicago (2005).
- [28] D. G. Grier and J. E. Curtis. “Transverse optical accelerator and generalized optical vortices.” U. S. Patent Application 20050017161, The University of Chicago (2005).
- [29] D. G. Grier and P. T. Korda. “Apparatus and process for the lateral deflection and separation of flowing particles by a static array of optical tweezers.” U. S. Patent Application 20050001063, The University of Chicago (2005).
- [30] D. G. Grier. “Optical fractionation methods and apparatus.” U. S. Patent Application 20050078343, The University of Chicago (2005).

- [31] D. Grier and W. Lopes. “Apparatus and method to generate and control optical traps to manipulate small particles.” U. S. Patent Application 20050176134, Arryx, Inc. (2005).
- [32] D. G. Grier and E. R. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” U. S. Patent Application 20050152039, The University of Chicago (2005).
- [33] D. G. Grier, E. R. Dufresne, J. E. Curtis and B. A. Koss. “Apparatus for using optical tweezers to manipulate materials.” U. S. Patent Application 20050098717, The University of Chicago (2005).
- [34] D. G. Grier and S. H. Behrens. “Optical peristaltic pumping with optical traps.” U. S. Patent Application 20050145785, The University of Chicago (2005).
- [35] J. E. Curtis, B. A. Koss and D. G. Grier. “Use of multiple optical vortices for pumping, mixing and sorting.” U. S. Patent Application 20040211889, The University of Chicago (2004).
- [36] D. G. Grier and E. R. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” U. S. Patent Application 20040021949, The University of Chicago (2004).
- [37] D. G. Grier, E. R. Dufresne, J. E. Curtis and B. A. Koss. “Apparatus for using optical tweezers to manipulate materials.” U. S. Patent Application 20040036976, The University of Chicago (2004).
- [38] D. G. Grier and S. H. Behrens. “Optical peristaltic pumping with optical traps.” U. S. Patent Application 20040051034, The University of Chicago (2004).
- [39] D. G. Grier and L. Gruber. “Broad spectrum optically addressed sensor.” U. S. Patent Application 20040058455, Arryx, Inc. (2004).
- [40] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” U. S. Patent Application 20040105158, The University of Chicago (2004).
- [41] D. G. Grier, W. Lopes and E. Dufresne. “Apparatus, system and method for applying optical gradient forces.” U. S. Patent Application 20040207922, The University of Chicago (2004).
- [42] L. Gruber, K. Bradley, W. Lopes, R. W. Lancelot, J. S. Plewa and D. G. Grier. “System and method of sorting materials using holographic laser steering.” U. S. Patent Application 20040089798, Arryx, Inc. (2004).
- [43] L. Gruber, D. G. Grier and W. Lopes. “Configurable dynamic three dimensional array.” U. S. Patent Application 20040180363, Arryx, Inc. (2004).
- [44] J. E. Curtis, B. A. Koss and D. G. Grier. “Use of multiple optical vortices for pumping, mixing and sorting.” U. S. Patent Application 20030132373, The University of Chicago (2003).
- [45] D. G. Grier and P. T. Korda. “Apparatus and process for the lateral deflection and sorting of flowing particles by a static array of optical tweezers.” U. S. Patent Application 20030047676, The University of Chicago (2003).
- [46] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” U. S. Patent Application 20030086175, The University of Chicago (2003).

- [47] D. G. Grier. “Parallel scanned confocal microscope.” U. S. Patent Application 20030021016, The University of Chicago (2003).
- [48] D. G. Grier and S. H. Behrens. “Optical peristaltic pumping with optical traps.” U. S. Patent Application 20020185592, The University of Chicago (2002).
- [49] D. G. Grier, E. R. Dufresne, J. E. Curtis and B. A. Koss. “Apparatus for using optical tweezers to manipulate materials.” U. S. Patent Application 20020181113, The University of Chicago (2002).

PCT Applications

- [1] D. G. Grier, F. C. Cheong and K. Xiao. “Automated real-time particle characterization and three-dimensional velocimetry with holographic video microscopy.” PCT Patent Application WO 2010/101671, New York University (2010).
- [2] D. G. Grier, S.-H. Lee and C. F. Chiong. “Tracking and characterizing particles with holographic video microscopy.” PCT Patent Application WO 2009/059008, New York University (2009).
- [3] P. M. Chaikin, D. Pine and D. G. Grier. “Self-replicating materials.” PCT Patent Application WO 2008/076414 (2008).
- [4] D. G. Grier. “Holographic microfabrication and characterization system for soft matter and biological systems.” PCT Patent Application WO 2008/127410, New York University (2008).
- [5] D. G. Grier, Y. Roichman and I. Cholis. “Extended optical traps by shape-phase holography.” PCT Patent Application WO 2007/067524 (2008).
- [6] S.-H. Lee and D. G. Grier. “Holographic microscope system and method for optical trapping of materials.” (2008).
- [7] Y. Roichman and D. G. Grier. “Three-dimensional holographic ring traps.” PCT Patent Application WO 2008/063809 (2008).
- [8] D. G. Grier, R. Agarwal, G. Yu, C. M. Lieber, K. Ladavac and Y. Roichman. “System and method for processing nanowires with holographic optical traps.” PCT Patent Application WO 2007/084114 (2007).
- [9] D. G. Grier, Y. Roichman, W. Man, P. M. Chaikin and P. J. Steinhardt. “Assembly of quasicrystalline photonic heterostructures.” PCT Patent Application WO 2007/009046 (2007).
- [10] D. G. Grier, M. Polin, S.-H. Lee and Y. Roichman. “Manipulation of objects in potential energy landscapes.” PCT Patent Application EP1703524 (A2) (2006).
- [11] D. G. Grier. “Modulated optical tweezers.” PCT Patent Application WO 2006/078759 (2006).
- [12] D. G. Grier. “Optical fractionation methods and apparatus.” PCT Patent Application WO 2004/104551 (2004).
- [13] D. Grier. “Optical accelerator and generalized optical vortices.” PCT Patent Application WO 2004/025668 (2004).

- [14] D. G. Grier and E. Dufresne. “Apparatus and method for fabricating, sorting, and integrating materials with holographic optical traps.” PCT Patent Application WO 224/014112 (2004).
- [15] L. Gruber, K. Bradley, W. Lopes, R. W. Lancelot, J. S. Plewa and D. Grier. “System and method of sorting materials using holographic laser steering.” PCT Patent Application WO 2004/012133 (2004).
- [16] J. E. Curtis, B. A. Koss and D. G. Grier. “Use of multiple optical vortices for pumping, mixing and sorting.” PCT Patent Application WO 2003/063559 (2003).
- [17] D. G. Grier and L. Gruber. “Broad spectrum optically addressed sensor.” PCT Patent Application WO 2003/098183 (2003).
- [18] D. Grier and W. Lopes. “Apparatus and method to generate and control optical traps to manipulate small particles.” PCT Patent Application WO 2003/088723 (2003).
- [19] D. G. Grier and P. T. Korda. “Apparatus and process for the lateral deflection and separation of flowing particles by a static array of optical tweezers.” PCT Patent Application WO 2003/024163 (2003).
- [20] D. G. Grier. “Parallel scanned laser confocal microscope.” PCT Patent Application WO 2003/012517 (2003).
- [21] L. Gruber, D. Grier and W. Lopes. “Configurable dynamic three dimensional array.” PCT Patent Application WO 2003/001178 (2003).
- [22] D. G. Grier and S. H. Behrens. “Optical peristaltic pumping with optical traps.” PCT Patent Application WO 2002/098617 (2002).
- [23] D. Grier, W. Lopes and E. Dufresne. “Improved apparatus, system and method for applying optical gradient forces.” PCT Patent Application WO 2002/093202 (2002).
- [24] D. G. Grier, E. R. Dufresne, J. E. Curtis and B. A. Koss. “Apparatus for using optical tweezers to manipulate materials.” PCT Patent Application WO 2002/088704 (2002).
- [25] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” PCT Patent Application WO 2002/056431 (2002).
- [26] D. G. Grier and E. R. Dufresne. “Apparatus for applying optical gradient forces.” PCT Patent Application WO 1999/039223 (1999).
